Architektur Konstruieren ist im besten Sinne ein Handbuch [] das Baustoffe, Bauelemente und Strukturen vorstellt, anhand bemerkenswerter Architektur exemplifiziert und in einem breiten kulturellen Kontext verortet. Es eignet sich daher auch für interessierte Laien, die wissen wollen, wie Architektur entsteht." Neue Zürcher Zeitung "Wer braucht also dieses Buch? Wenn Studenten es gelesen haben, sollte sie keine Klausur mehr schrecken, und ausserdem hatten sie, neben den technischen Tricks, auch den Sinn der ganzen Sache begriffen. Dass das Buch lesenswert ist und es Spass macht, darin zu stöbern, macht es auch für andere empfehlenswert." Bauwelt" --This text refers to the Hardcover edition.

Andrea Deplazes, Eidgenössische Technische Hochschule (ETH) Zurich, Switzerland.

I am an architecture student going into my third year of school, and having admired excerpts of this book sent around by one of my professors, I decided to order this book. This is not just a book listing the way buildings come together; while it does that, it also carefully analyzes the inspirations,

references, examples, and reasoning behind every element of building. It is a good read, with plenty of imagery and detail drawings to support it.

Great
