Soap And Cosmetic Labeling: How To Follow The Rules And Regs Explained In Plain English

Synopsis

So you just developed an awesome soap or cosmetic product. You gave it out to friends and family who raved about it and urged you to put it on the market. You checked on what that would take and that's when you hit the wall of rules and regulations. Thud! Does that mean you've hit a dead end? Absolutely not! In *Soap & Cosmetic Labeling*, author Marie Gale clearly explains the different rules and regulations that apply to labeling soaps and cosmetics and other related products. As she says, "getting the labeling right isn't very complicated... but it is very detailed." • This book explains, in plain English, how to follow product labeling rules and regulations from: Food, Drug & Cosmetic Act Fair Packaging and Labeling Act Uniform Weights & Measures Law Uniform Packaging and Labeling Regulations State Laws ... and more! The 3rd edition has been updated to include more images, diagrams and examples, more explanations - particularly for true soap - and more background on the actual laws and regulations and how they came into being. In all, the 3rd edition contains 38 more content pages. Whether you're an old hand or a newcomer to the business of soap and cosmetics, you'll find the information presented here clear and easy to understand, and *Soap & Cosmetic Labeling* an excellent guide through the maze of labeling regulations.

Marie Gale is a self-professed computer geek who actually likes reading laws, statutes, regulations, court cases and old books. She probably would have been a lawyer or a chemist had things worked out differently. As it is, in 1998 she started making and selling handcrafted soap and cosmetics. Her

tendency toward research of all kinds, led her to delving into labeling regulations, resulting in her book "Soap and Cosmetic Labeling" (2008). Involvement with the community of soap and cosmetic handcrafters and seeing the need for good manufacturing practices, brought about her book "Good Manufacturing Practices for Handcrafters" (2012). Her love of old books became the driving force behind her extensive library of antique and vintage books about the making and use soap and cosmetics, particularly those products made with natural ingredients. Wanting to share at least some of the amazing recipes available in her library, Marie published "300 Years of Natural Soap & Cosmetic Recipes" (2011). Marie lives in Southwestern Oregon with the man of her life. When not participating in the handcrafted soap and cosmetic community, she can be found doing website programming, managing her family's timber ranch or researching her family tree.

This book is great. It goes through the laws and who makes them etc at the beginning (which is where I am currently in reading) then later explains more about what is needed in labeling. It is a great book if you are new to making and/or wanting to sell soap, lotion bars, lip balm etc like I plan to do.

When you want to go into business no matter how small or big this is. Must need book!!!! Thanx for all the people that brought this book to us soapiers!

Must have book for any Soapers soap book collection! Know how to properly label your soaps, lotions, scrubs...everything! This book breaks it all down.

Very informational and technical. This is a book you settle in with for a couple hours and take lots of notes. It gives tons of terrific advice and information about labeling, I just wish it was updated a bit more for the times. If you are planning on having a business whether making soap or any sort of cosmetic--you should definitely buy this book.

This book is amazing. It's well written in plain English with lots of diagrams and instructions. I'm reworking the labels I already had to comply with the law, because I want to do it right.

it's a good guide for home soap makers that may want some really helpful advice to avoid problems if you would want to sell perhaps to a neighbor or at a craft sale.

Important information to know if you want to sell your products.

This book has saved me so much time and the contact email for the author is accurate - she responded to my questions! This book is my guide!!
