Instrument Rating Practical Test Standards For Airplane, Helicopter And Powered Lift: FAA-S-8081-4E (Practical Test Standards Series)

Synopsis

For flight instructors, FAA examiners and FAA license applicants, the Practical Test Standards (PTS) are used to prepare for, review, take, or issue the checkride. They list the knowledge and experience prerequisites, the levels of skill that must be demonstrated, and describe background study and reference materials. ASA reprints the most current FAA Practical Test Standards in this series of handy cockpit-sized guides. Every PTS is written by the FAA and lists the details about the type and levels of skill and knowledge that must be demonstrated before an examiner can issue a certificate or rating to an applicant. This edition is the FAA PTS for the Instrument Rating for Airplane, Helicopter, and Powered Lift.

Customer Reviews

The Federal Aviation Administration is the government organization that regulates and sets procedural standards for the aviation industry.

It's a PTS.. You need this for your checkride. Other than using it to know what will be asked on the checkride, you will most likely need to reference it when talking about the instrument proficiency check (IPC). I was asked this on my checkride, it shows you what you need to do to complete an IPC and when you would need one (that is something that needs to be memorized anyhow, but this shows the individual tasks which you can show the examiner to help boost your answer). Passed on

the first try. No complaints.

Everything good!

The one that I received doesn't include 2016 updates

Very fast shipping, great product!

Thanks

It is what it says it is.

Can't pass your IFR practical test without it! Make sure you purchase the most current copy for your testing needs!

Passed the instrument rating on the first try, due in part to this book - that'd be the helicopter instrument rating.
