From traditional skills to the newest techniques, Storey's Bulletins provide a foundation of earth-friendly information for the way you want to live today.

Henry W. Art is Professor of Environmental Studies and Biology at Williams College and the author of WoodsWalk.

Creating a Wildflower Meadow is quite short, more of a pamphlet than a book, but what it lacks in

length, it makes up for with information. The text is simple, direct and informative. It is divided into two sections: the first describes the process of creating the meadow. The second section is a flower-by-flower description of North American wildflowers. There is a detailed line drawing of each plant. The drawings are black and white. This book is well worth the small investment required.

Concise and informative, this thirty-two page book is certainly worth the ..[money]. It contains useful charts and lists to guide thereader in choosing meadow flowers and grasses appropriate to their region and design scheme.
