Claims, Disputes And Litigation Involving BIM

Synopsis

Are you unsure about: the current US legal environment with respect to BIM and VDC? the evolving standards of care for design and construction professionals using BIM and VDC? what practical methods and techniques can be used for analyzing construction claims and disputes involving BIM technologies and VDC processes? Building Information Modeling (BIM) technologies and Virtual Design and Construction (VDC) processes are aggressively and fundamentally changing the design, construction and operation of buildings. Supporters of BIM have highlighted the potential these technologies have to reduce the need for claims, disputes and litigation, but evidence from several early sources shows they are not universally successful in this. This timely and unique book provides crucial new methods for analyzing construction disputes in this emerging AEC technological landscape. It explains how BIM & VDC has significantly altered the production and delivery of construction drawings, quantity surveys, and schedules, and how these changes might impact construction disputes. The findings and advice in this book are indispensable to any stakeholder in a construction project using BIM. It will help Contractors, Cost Managers, Architects, Building Designers, Quantity Surveyors, and Project Managers to navigate and understand their responsibilities and exposure to risk when working with this new technology.

Book Information

Hardcover: 222 pages

Publisher: Routledge; 1 edition (July 2, 2015)

Language: English

ISBN-10: 0415858941

ISBN-13: 978-0415858946

Product Dimensions: 6.1 x 0.6 x 9.2 inches

Shipping Weight: 12.8 ounces (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 1 customer review

Best Sellers Rank: #813,872 in Books (See Top 100 in Books) #71 in Books > Law > Business > Construction #252 in Books > Textbooks > Law > Tax Law #717 in Books > Law > Tax Law

Customer Reviews

Jason M. Dougherty is a BIM/VDC specialist with over a decade of practical experience across the entire AEC industry spectrum. He has worked with some of the largest architectural firms in the world utilizing technology to drive solutions to architecture and engineering issues, assisted owners with successfully implementing BIM/VDC both contractually and technologically across their

enterprises, and served as a retained expert in disputes involving BIM/VDC issues. He has had numerous articles on BIM/VDC published in trade and professional journals, lectured internationally, and has given courses on the same subject both to students and practitioners.

Useful reference if mostly relevant to the USA contract environment.
