EARTH SCIENCE STUDENT EDITION 2006C

Synopsis

Renowned authors Edward Tarbuck and Frederick Lutgens invite students on a journey of observation, explanation, and participation in the study of Earth's processes. An accessible writing style, original artwork by Dennis Tasa, and powerful technology create a fresh new program that leads your diverse classroom on a path to discovery. This new edition is perfectly suited to today's high school curriculum. Bringing content to life, the integrated GEODe Key Concepts CD-ROM connects students to the world through video, animations, and assessment.

Customer Reviews

A good book for homeschooling. End of chapter questions are easy to understand. the lab section is gear more for a high school lab environment as opposed to the home.

Great book. Just as described. Would buy from this seller again.

Perfect replacement for a lost school textbook.

Excellent, interesting and easy to read with good on line backup

Interesting book..

It took over a week to receive and it was wrong. I emailed the seller to return since assures return policies. To this day no one has gotten back to me about how to return this item and get my money back.

I needed this book to create lesson plans for a college teaching course, and when I received it in the mail it was the wrong book. It was spiral bound paperback, with an entirely different cover. A lot of the content was similar to the book that is pictured above, but many chapters were not present and the quality of the book was poor. As a result I am scrambling to buy this book to finish my assignments in time. DO NOT BUY THIS BOOK FROM THIS SELLER.

Exactly as advertised. Saved by not paying the school's same price tag to replace the book.
