Case Studies In Library And Information Science Ethics

Synopsis

This valuable book, written specifically for library and information science professionals, presents 125 case studies that combine theories of ethics and librarianship with practical, real-life scenarios. After an introduction to ethics in library and information science, chapters are devoted to ethical issues in five categories: intellectual freedom, privacy, intellectual property, professional ethics, and intercultural information ethics. Each chapter has a theoretical introduction to the issue under consideration followed by 25 case studies, each of which includes its own set of discussion questions. Perfectly suited to classroom use, these case studies help bridge the complicated gap between students, academics, and practitioners in the field by promoting critical thinking and responsible action.

Book Information

Paperback: 175 pages

Publisher: McFarland (October 29, 2008)

Language: English

ISBN-10: 0786433671

Customer Reviews

"thoroughly well-done...a great analysis of librarianship's current problems. The authors have taken great pains to present timely and well-done cases" --Arba
"interesting" --The Australian Library Journal

Elizabeth A. Buchanan is associate professor and director of the Center for Information Policy Research, School of Information Studies, University of Wisconsin-Milwaukee. Kathrine A. Henderson is research librarian, State of Arizona Office of the Auditor General, in Phoenix, Arizona.

It is written very well, and the information is conveyed effectively.

This book is short but informative. Many of the cases are problems that librarians run into often and they really have no clear answer. This book is great at helping you prepare for these types of situations by getting you thinking about problems and solutions.
