Roman Medallions In The British Museum

Synopsis

PREFACE. THIS volume contains a Catalogue of the Roman Medallions in the British Museum. The metal of each specimen is given, and its size in inches and tenths. The weight of all examples in gold and silver is stated in English grains. Tables for converting grains into grammes, and inches into millimetres, as well as into the measures of Mionnet's scale, are given at the end of the volume (pp. 152-154). A table of dates and titles also there given (pp. 131-151) will enable the reader to find the year or period to which each medallion may be ascribed. Every medallion of interest is figured in the plates, which are executed by the Autotype mechanical process from casts in plaster, except in the case of the finest specimens, which are from drawings by Miss Godsall. The work has been drawn up under my direction by Mr. Herbert A. Grueber, Assistant in the Department of Coins and Medals. In the revision I have had the valuable aid of Mr. Head, Assistant Keeper, and Mr. Gardner, Assistant in the same Department.---
