IEC 62304 Ed. 1.0 B:2006, Medical Device Software - Software Life Cycle Processes

Synopsis

Defines the life cycle requirements for medical device software. The set of processes, activities, and tasks described in this standard establishes a common framework for medical device software life cycle processes. Applies to the development and maintenance of medical device software when software is itself a medical device or when software is an embedded or integral part of the final medical device. This standard does not cover validation and final release of the medical device, even when the medical device consists entirely of software.

Book Information

Paperback: 164 pages

Publisher: Multiple. Distributed through American National Standards Institute (ANSI) (August 19, 2007)

Language: English

ASIN: B000XYSCH6

Product Dimensions: 8.2 x 0.4 x 10.5 inches

Shipping Weight: 1 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #6,042,371 in Books (See Top 100 in Books) #100 in Books > Engineering & Transportation > Engineering > Reference > American National Standards Institute (ANSI)

Publications #933420 in Books > Textbooks
