Customer Reviews

We love all the research guides for MTH. They are written at a higher Lexile level than the stories but it makes them fun to read together. My 6 year old doesn't have the patience to read through a research guide the entire way through on her own but together it makes for a fun project...she gets to tell me about what happened in the story to Jack & Annie and together we learn some fun facts about whatever time/place the story was about.

It was very difficult to find a book that was geared towards young readers that had details about animals of the Ice Age - but this book is perfect! This is a great book filled with facts about Ice Age animals. It has a number of pages dedicated specifically to the sabertooth, but also has info on some of the other Ice Age creatures. Also discusses what life was like for the people of the time.

Great book for children interested in learning about the Ice Age. Although it is from the "Magic Tree House" series, children don't have to read or know anything about the series to learn from and enjoy this book. Good info for adults, too!

My grandson had had a tough week. He loves books. He had always wanted a fact checker book. When it was this one about sabertooth tigers and the ice age, he had to sit down and read it. It made his week because he had just finished the Magic Tree House Book #12..

My daughter loves this series. Very informative for her age. She loves Magic Tree house books, so she is very happy to know something new from Jack and Annie. I think this series one of the best nonfiction's books for kids.

This book is helpful with facts & information about the Ice Age. It paints a great picture of the animals, landscape, and survival.

I love this book so much, but I felt bad about the Woolly Mammoths who were killed:(,but natives

had to eat

An exciting book for a 6 year old that likes wild animals.
