Art Models 5: Life Nude Photos For The Visual Arts (Art Models Series)

Synopsis

Whether for work on a finished piece, trying a new technique, or getting in some practice time, this figure study enables artists to work when and where they want with their choice of model and pose. This book in the series features 12 new male and female art models – as well as Becca from the previous book – in a collection of poses selected by readers and visitors to the authors' website. The contrast has also been increased in many of the photos to provide deeper, more challenging shadows. While the guide includes individuals and couples with a wide range of body types in natural, relaxed stances as well as some inspired by classical works of art, the primary focus is on dynamic poses – twisting, scrunching, reaching, and even fighting. Poses are precisely lit, revealing every area of the model, and have been carefully chosen to illustrate important effects such as foreshortening and perspective changes. A judicious amount of photo retouching is done, not to make the models more glamorous or plastic, but to remove distractions that detract from the essence of the models. Each photo may be zoomed in on specific body parts to achieve a higher level of detail. This ebook does not have the full 360-degree views of every pose. If you would like all the views of all the poses, please see the Companion Disk or print book with disk.

Customer Reviews

One big problem for less-experienced artists, in figure drawing, is foreshortening. The studies in this DVD are especially helpful in coping with this difficulty. For each pose there is a series of photos -- the same model in the same pose -- but taken from a number of positions encircling the model. The increments are close enough that the student can observe the arm or the leg from the "side," "end-on," or in-between, and discover the development of the foreshortening. This experience should enable the student to draw the foreshortened limb or torso with much greater understanding.

I have bought many books like this over the years as an amateur illustrator. I'll never be an artist. But I like to draw for fun and sometimes profit. But I need to "see" what I am drawing. I can't do it in my mind's eye. Usually the models in books like this are like me. Just average people. But this one had some really beautiful women and men in action poses as well as static. That alone was worth the price. It's a beautiful book just to look at. And it has some of the best poses of live models I have yet seen. I loved it at once. This was wonderfully inspirational.

These books are great! Basically the deal here is the book is like a catalog for the cd/dvd of 360° poses. If you use a computer to create art or for reference, you might want to look into just the dvd's without the book. The book only has one shot or so from each 360° photo set. The cd/dvd that's included is all hi rez photos and a pdf file of the book.... so it's really worth the price for that alone.

I've been involved in life drawing since 1955, I taught art for a time and still attend a group weekly. Some of the issues of life classes are overcome or ameliorated by this DVD with its 14Mpx images. A fairly wide selection of models and poses: (sedentary, classical and dynamic, are available. Choose a time and timing and viewpoint to suit yourself. Compared with model costs this DVD is top value.

This book has more action shots of models rather than stationary poses. In certain circumstances that can be good, but I have liked some of the other books in this series more than this one.

An excellent aid to figure drawing and painting for artists. Very helpful reference for figure poses for the artist without recourse to a model.

great resource book for postures.

Excellent reference book, I highly recommend it!! This is good for general pose ideas. Remember though that nothing can really compare to a live model. Otherwise excellent.
