The Shroud Of Turin: First Century After Christ!

Synopsis

The Turin Shroud is the most important and studied relic in the world. Many papers on it have recently appeared in important scientific journals. Scientific studies on the relic until today fail to provide conclusive answers about the identity of the enveloped man and the dynamics regarding the image formation impressed therein. This book not only addresses these issues in a scientific and objective manner but also leads the reader through new search paths. It summarizes the results in a simple manner for the reader to comprehend easily. Many books on the theme have been already published, but none of them contains such a quantity of scientific news and reports. The most important of them is the following: the result of the 1988 radiocarbon dating is statistically wrong and other three new dating methods demonstrate that the Shroud has an age compatible with the epoch in which Jesus Christ lived in Palestine. A numismatic analysis performed on Byzantine gold coins confirms this result. This book is, therefore, very important with respect to the Turin Shroud. It is unique in its genre and a very useful tool for those who want to study the subject deeply.

Book Information

Hardcover: 450 pages

Publisher: Pan Stanford; 1 edition (June 10, 2015)

Language: English

ISBN-10: 9814669121

ISBN-13: 978-9814669122

Product Dimensions: 1 x 6.5 x 9.5 inches

Shipping Weight: 1.7 pounds (View shipping rates and policies)

Average Customer Review: 3.9 out of 5 stars 5 customer reviews

Best Sellers Rank: #305,362 in Books (See Top 100 in Books) #27 in Books > Computers & Technology > Graphics & Design > Computer Modelling > Imaging Systems #41 in Books > Science & Math > Mathematics > Applied > Graph Theory #225 in Books > Science & Math > Chemistry > Physical & Theoretical

Customer Reviews

"This is one of the books John [Jackson] may have had in mind for publication after hundreds of man-years of collective research even two thousand years after the death of Jesus. It is unique in the depth of material covered that supports dating the Shroud progressively back to the first century. It is an outstanding contribution to Shroud studies." • Robert W. Siefker, The Turin Shroud Center

of Colorado, USA "Prof. Fantiâ™s new book is a major new work in the field of literature on the Shroud. It is of great value as it provides the details and results of very interesting new research for which Fanti has been responsible. It is an essential addition to any library or collection of written work on the Shroud of Turin." • Mark Oxley, author of The Challenge of the Shroud "After decades of dedicated research, Dr. Fanti and his colleagues have developed a new scientific method to date ancient linen, whose result is consistent with the extensive scientific and medical evidence derived from the unique Shroud of Turin. Fantiâ™s result is also completely different from the Shroudâ™s medieval C-14 dating, constituting the first direct scientific challenge to the dating of this famous cloth." • Mark Antonacci, author of The Resurrection of the Shroud, Test The Shroud Foundation "The chapter on numismatic investigation is very interesting because it gives a very clear indication that the Shroud existed before the period between 1260 and 1390 AD, established by the radiocarbon dating tests. The book is highly recommended." • Petrus Soons, Shroud Researcher from Panama "Fanti, for first time, experimentally proves that the threads of the Shroud can be 2000 years old. This book is a good opportunity to be updated on the knowledge of the Holy Shroud." • CÃºsar Barta, Centro EspaÃ±ol de Sindonologia, Spain

Giulio Fanti is associate professor of mechanical and thermal measurements at the Department of Industrial Engineering, University of Padua, Italy. After gaining experience in spatial structures, and also in tethered satellites and image analysis, he has directed since 1997 his interest to the Shroud to fill some gaps, especially with reference to the body image impressed in it, which is still scientifically inexplicable. He was responsible for a university research project concerning the most important relic of Christianity and has headed for more than 10 years the Shroud Science Group, a group of about 140 scientists dedicated to study of the relic. He has published more than 170 scientific works in international journals. He has authored 8 books and more than 50 scientific works on the Shroud. Pierandrea Malfi holds a masterâ™s degree with honors in mechanical engineering from the University of Padua. His thesis was based on the mechanical dating of textile fibers, whose results have also been published in scientific journals. He has set up and computerized the Antonio Maria Traversi Physics Museum of Marco Foscari High School in Venice, Italy, of which he has been scientific curator for more than 10 years.

I read this book a few years ago when a friend of mine lent it to me. Thereafter, I ended up getting a copy of my own. The research by Professor Fanti was thought-provoking and eye-opening. It helped inspire my own cryptologic research project into a question that kept nagging at me: Did Christ's

disciples encode the New Testament with hidden ciphers about the Shroud? My five year long project resulted in my non-fiction book about the amazing results I achieved that clearly showed the gospels were indeed enciphered with hundreds of clues about the Shroud. Had it not been for books like the Turin Shroud by Fanti, my book, Shroud Codes in the Bible, might never have been written.

Fanti has brought together into one place an excellent resource for those interested in learning about the Shroud of Turin. Not for nothing is the Shroud of Turin the most studied and scrutinized physical object on the planet in all of science. Increasingly, it is being demonstrated that the most advanced techniques available in the 21st century fail to emulate the measurable qualities and quantities characteristic of this relic. If you do not already have the information in this book from a wide range of scholars and analyses, then your savvy about it leaves something to be desired. Read it. Buy it. It's well worth the price of admission.

The latest shroud book from giulio Fanti who is a primary shroud scholar from Italy. Giulio has recently done seminal work on alternative dating technologies based on degradation of mechanical characteristics of linen fibers. This is his latest book translated into English.

The Only real picture of Christ we are left with....(til we get Home to Heaven!)

Extremely important book! It's most groundbreaking contribution is presentation of new dating methods, which have been used successfully at this complicated ancient artefact known as the Turin Shroud. These dating techniques have been tested f.ex. in the Padova University during the past 15 years. The well known C14 testing of the Shroud in 1988 was a fiasko, as many later studies have shown. Besides, many reasonable critics towards the C14 testing in general has also given (in this book too), especially when the object have been exposed to contamination hundreds of years. Therefore new kind of high-tech dating methods have developed, which are useful in cases like this. There are now at least four testing methods which can be used for the Turin Shroud. First of them was presented by Dr. Ray Raymond's in the peer-reviewed scientific article in *Thermochimica Acta* (2005), and the three others in this book. All of them date this object around the time of Christ. Dr. Juha Hiltunen, anthropologist.
