Annals of Allergy, Asthma, and Immunology , 14-JAN-05, Stanley Fineman, MD, MBA, Atlanta Allergy and Asthma Clinic, Marietta, GA -- "During their rotation in allergy/immunology, students and residents frequently ask for a concise book that can readily provide them with basic facts that are useful when caring for patients with allergy. The Washington Manual(r) Allergy, Asthma, and

Immunology Subspecialty Consult can fulfill that function. Carefully written by fellows, faculty, and practitioners mainly from Washington University School of Medicine in St. Louis, MO, the stated purpose of this book is 'to provide enough information...to evaluate a patient until more in-depth reading can be done on a particular topic.'... "One of the best chapters in the book is titled 'Drug Allergy and Desensitization.' In this chapter, Dr. Jost, one of the main editors, makes a wonderful presentation of this complex problem. The pretreatment schedules and desensitization protocols provide practical information that can be particularly helpful for the busy resident or fellow... "There are two more chapters by Dr. Jost that are particularly laudable. 'Conditions Associated with Eosinophilia' and 'Primary Immunodeficiencies' are both complete, accurate, and well referenced and clearly would be helpful for students and residents as a starting point in their learning about these complicated topics. "Students and residents seem to have a growing interest in fellowship training in allergy/immunology. The Washington Manual(r) Allergy, Asthma, and Immunology Subspecialty Consult is useful to whet the appetite of the student or resident looking for a short, entry-level text about allergic diseases."-Annals of Allergy, Asthma, and Immunology
